

Aerotec Happy Snaps

Aerotec provides Happy Snaps of transmission line structures, obstacles, critical terrain features, encroachments, utility wire crossings, difficult access areas, and other items of interest.

Happy Snaps can be used in substation site selection, facility and right-of-way documentation, and GIS population.

Aerotec's Happy Snaps are delivered as hard copy prints or electronically, and are used for:

- Documentation of field information (structure types, guying, etc.) for use by transmission engineers
- Documentation of access and construction difficulties for construction maintenance crews
- Collection of asset information for GIS population
- Documentation of defective transmission line structures and equipment
- Documentation of encroachments, obstacles, railroads, roads, etc. for in engineering, right-of-way management, and permitting
